Dica

Se possível, use o mesmo username/handle em todas as plataformas para facilitar a identificação.

1.1 Vjudge

- Acesse o site [vjudge](https://vjudge.net).
- Clique em "Register".

Figura 1.1. Página inicial do Vjudge.

- Preencha o formulário:

Register

* Username:

IMPORTANT: Once registered, you can't change it !

* Password:

* Repeat Password:

Repeat password above

Nickname:

School:

* Email:

Invisible to others. Please fill a real one. You need it after you forget the password.

Valuable Resources
CodeForces - 485B

Many computer strategy games require building cities, recruiting army, conquering tribes, collecting resources. Sometimes it leads to interesting problems.

Let's suppose that your task is to build a square city. The world map uses the Cartesian coordinates. The sides of the city should be parallel to coordinate axes. The map contains mines with valuable resources, located at some points with integer coordinates. The sizes of mines are relatively small, i.e. they can be treated as points. The city should be built in such a way that all the mines are inside or on the border of the city square.

Building a city takes large amount of money depending on the size of the city, so you have to build the city with the minimum area. Given the positions of the mines find the minimum possible area of the city.

Input

The first line of the input contains number n — the number of mines on the map ($2 \leq n \leq 1000$). Each of the next n lines contains a pair of integers x and y — the coordinates of the corresponding

Figura 3.1. Problema no VJudge.

- Clique em "Submit" e escolha "Submit by My Account".

A screenshot of a 'Submit' dialog box. It contains fields for 'Problem' (CodeForces - 485B), 'Open' (Yes/No buttons), 'Submit By' (Bot, My Account, Archive buttons), 'Account' ((Not Set), Update link), 'Language' (Select Language dropdown), and 'Code' (a large text area with a placeholder 'At least 20 characters'). At the bottom are 'Cancel' and 'Submit' buttons.
